UNITED WAY

Measuring Program Outcomes Workbook.

Group members each presented their findings based on the review of their resources according to the criteria set forth in the review tool. The group discussed each resource in some detail. It was determined that Project Star should not be listed as a core resource due to its emphasis on performance measurement, but the rest were all strong in various areas.

Next Steps. Jennifer will compile comments and review results in a separate document for review at our next meeting, set for **July 13, 2005.**
